PARTS

PONSSE Genuine Parts - Ecoparts - Accessories - Budget Parts

Ponsse parts ensure the availability of your machine. We will quickly and efficiently deliver you high-quality parts and accessories suitable for your needs.

PONSSE Genuine Parts

Ponsse offers an extensive selection of genuine machine parts. By using PONSSE Genuine Parts, you ensure reliability of your forest machine fleet. PONSSE Genuine Parts are the best solution, because their quality and reliability have been ensured with care. They enable a long service life for your forest machine.

Parts Kits include the main component and all the parts and accessories required for high-quality, fluent servicing and repairs. This group also includes various parts assortments; a package includes all the parts of the same type for a machine type (such as pins, fittings, screws, and nuts).

Preventive Maintenance Packages are designed in accordance with the Ponsse Preventive Maintenance Scheme. By ordering these, a customer can ensure that there will be just the right number of high-quality genuine parts available during periodic servicing. Ready-made packages will also save time and money. Preventive Maintenance Packages include filter sets, for example.

Update Packages are designed for major basic servicing of forest machines. The Update Packages can be used to update larger entities on the forest machines, such as the harvester head, crane or base machine, so they will be as good as new. The Update Packages include all the parts needed for basic servicing of a certain part of the machine. An example of an Update Package is a harvester head measuring wheel package.

You can use **Upgrade Packages** to improve the features of your forest machine. Ponsse offers Upgrade Packages for information systems, for example. When such a package is used, the software, control module and computer will be updated with the latest technology. With Ponsse's retrofitting options, you can also purchase additional features you want for your machine at a later time.

Classic Parts are genuine parts of ensured quality that have been inspected. Ponsse offers these parts for older machine types that are no longer in production. Please contact your closest Ponsse Service Center for the prices and availability of Classic Parts.

PONSSE Ecoparts

PONSSE Ecoparts are an affordable and environmentally-friendly alternative. We offer both already repaired parts and a part repair service. Ecoparts enable you to obtain affordable products that are as good as new, and by recycling old parts you will also save the environment.

REMAN (Remanufactured) Parts is a service developed by Ponsse. It is based on recycling and reconditioning used service parts, and you can use it to ensure uninterrupted use of your forest machines, flexibly and affordably. You can return a damaged part to Ponsse and replace it by buying a REMAN part which Ponsse has carefully reconditioned. We will compensate you for the returned part when you purchase a REMAN part. You will quickly obtain a new part, and will also save money and the environment.

Recondition-On-Demand Parts is a new service offered by Ponsse: you can now send

some damaged parts to Ponsse for repair. Ponsse will assess the repair needs, offer a repair cost estimate and repair the part if you agree.

PONSSE Accessories

PONSSE Accessories are high-quality products designed for forestry professionals, leisure or home needs. The selection includes clothing and leisure accessories, tools and other accessories required by forestry professionals.

PONSSE Collection includes high-quality clothing and other accessories designed for work and leisure. The materials and colors of the clothes and leisure accessories are designed to endure extensive wear and tear.

PONSSE Tools are tools and accessories designed especially for servicing PONSSE forest machines.

PONSSE Brand Accessories are accessories carefully selected by Ponsse for the needs of forest machine entrepreneurs. They meet all the Ponsse quality requirements.

Other accessories. In addition to our own PONSSE accessories, we offer an extensive selection of high-quality products from well-known manufacturers.

PONSSE Budget Parts

Ponsse also offers an extensive selection of used parts, an affordable alternative for forest machine service parts. The Budget Parts are an alternative worth considering if you do not need a new part and want to obtain a part at an affordable price. They are excellent for servicing an older machine or a backup machine, for example. Our Budget Parts selection includes used but still usable bonnets for exterior repairs, for example.
